SPEAKING TRAINER IN MY HAND

SUCCESSFUL TEACHING APPROACHES & METHODOLOGIES FOR ELT IN 2025

TOTAL PHYSICAL RESPONSE (TPR)

"The instructor is the director of a stage play in which the students are the actors." -James J. AsheTotal Physical Response (TPR) is a language teaching approach built around the coordination of speech and action; it attempts to teach language through physical (motor) activity. This approach is particularly suitable for low level learners or children, who are in the stage of learning basic words or phrases.

READER'S THEATER

"Reader's Theater motivates reluctant readers and provides fluent readers with the opportunity to explore genre and characterization."

-Susan Finney-

Reader's Theater is a fun and creative approach for learners to integrate reading, writing, listening, and speaking all in one activity. It turns literature into scripts to act out. Reading aloud, writing additional lines of dialog, and expressing the content as a play is the focus of this approach. Reader's Theater improves confidence and self-image by applying all communicative skills while working collaboratively.

EXTENSIVE READING

"Extensive Reading is not the best way. It's the ONLY way."

-Stephen Krashen-

Extensive Reading involves reading a large quantity of enjoyable books which are at the right level. The benefits of extensive reading come when the learner reads regularly. There are two kinds of extensive reading; reading for language development and reading for fluency. When the reading materials are carefully chosen to suit the learners' level, the reading practice allows the learners the continuous exposure to the target language they need in order to solidify and strengthen their language competence.

INTENSIVE READING

"It is predicted that with its comprehensive training and rich exercises, [Intensive Reading] will continue to be an indispensable ELT course."

-Weidong Yang-

Intensive Reading involves learners reading in detail with specific academic aims and tasks. Intensive Reading serves to deepen cognitive processing through learning and practicing specific vocabulary and reading comprehension skills. The goal is to push oneself to build skills and strategies by taking on more difficult material in a clear, focused, and intentional manner.

HIGHER ORDER THINKING SKILLS

"To be truly effective, teachers... you must also prepare students for the learning they will have to do after they leave your classroom. Students who develop Higher Order Thinking Skills become life-long learners."

-John Grischow-

Higher Order Thinking Skills (HOTS) is an educational concept based on the idea that learning requires different levels of cognitive processing. HOTS provides learners the capability of analyzing and processing new situations with existing information. By evaluating such experiences, students are developing problem solving skills, initiating different cognitive methods, and learn analysis skills such as critical thinking. In turn, these learners are then able to understand more of the world around them.

PROJECT BASED LEARNING (PBL)

Project-based learning (PBL) is a student-centered pedagogy that involves a dynamic classroom approach in which it is believed that students acquire a deeper knowledge through active exploration of real-world challenges and problems. (Copied from Internet, We should ask the Developers department to write the definition in an original way.

21ST CENTURY SKILLS DEVELOPMENT

The way we learn and teach is quickly changing. Communication, collaboration, creativity, and critical thinking combined with digital literacy are the foundation of the 21C approach. Practices and principles of learning approaches need to continuously adapt to the reality of current situations by developing competencies that are used in the real world. We examine how learners develop 21C competencies in addition to typical language-focused competencies. While there are slightly different versions of 21C skills, Compass examines the four critical areas of the framework.

COMMUNICATION WITH A CULTURAL MINDSET

Learning to speak English means learning to speak with people in other cultures. Language is more than just a code: it involves social practices and making and understanding meaning. Languages are a reflection of our own understandings and beliefs. Language and culture are closely bound, so we must consider how languages as a communication code and as a cultural practice are balanced in our teaching approaches.

COLLABORATION IN THE REAL WORLD

Focusing beyond just language teaching is essential to developing a life and career in a world filled with the realities of globalization. Learners need to develop the language competency to collaborate while also considering the ethical and cultural dynamics between language and culture. Preparing learners to operate in the real world through a combination of language with critical thinking about global perspectives ensures they will be ready to succeed through collaboration with and in a global context.

CREATIVE THINKING

Developing higher-order thinking skills and creative thinking is essential. To improve this, learners study language in context. This allows for meaningful acquisition and usage of authentic information. Meaningful learning builds emotional commitment to the content and ensures a deep learning experience, where learners can use creativity to expand and explore on the content. It allows learners to relate to what they're learning and therefore think creatively.

CRITICAL THINKING

The 21C world combines ubiquitous, unabated access to information with ever-blurring lines of accuracy of the same information. As such, educators and publishers need to prepare learners for this world. Gone are the days of learners working from a rote memorization of vocabulary and language points which focus on one-way narrative of knowledge acquisition.

Learners need more than ever to discern between alternative facts, fake news, real news, and everything in between. Meanwhile, exposure to authentic real-time content from multiple sources has never been higher. Therein, learners' opportunity has both never been more attractive and never been more daunting when it comes to distinguishing fact from fiction. Thus, it is essential for students today to truly master a wide range of subjects, such as English, world languages, arts, mathematics, science, economics, geography, history, and politics. In addition, these subjects should be taught in a way that enables understanding on global issues, world finance, health, and environment.

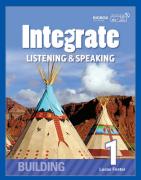

ELT BEST PRACTICES FOR

At Compass Publishing, we're always in communication with teachers, academic coordinators, and educational researchers from around the world. We enjoy learning about what teachers and learners are doing in their classrooms and how the field of ELT is constantly evolving. Our aim is to bring what we learn to the development of our products, by including the latest and most effective methods and strategies for language instruction. Here's a brief overview of some of the best practices in ELT and our key products that they are featured in.

2025

DIGITAL LITERACY

Increasingly, we consume and interact with most content through our devices, and digital literacy skills have become critically important for all jobs. Students need to develop the ability to efficiently access, evaluate, and use information. The language classroom can present students with chances to gain experience using digital media to access information and communicate their ideas more effectively.

CONTENT-LANGUAGE INTEGRATED LEARNING (CLIL)

Content Language Integrated Learning (CLIL) is an approach to teaching the content of curricular subjects through the medium of a non-native language. In a CLIL class, learners gain knowledge and understanding of the subject while simultaneously learning and using the target language, English. Through CLIL-type lessons, students can learn academic material and a foreign language at the same time, thus achieving a dual-focused objective. In the CLIL approach, language is seen as a way to acquire new knowledge, not the goal.

FOUR-STRAND THEORY

Created by Prof. Paul Nation, this approach to second-language instruction stresses the importance of balancing the four key strands: meaning-focused input, meaning-focused output, language-focused learning, and fluency development. Achieving a balance between these types of activities ensures learners will develop their knowledge of the features of the language while building their ability to use it to communicate fluently in a wide variety of contexts.

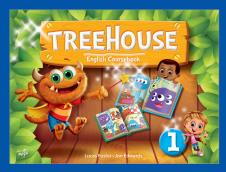

Featured in these titles

STEALTH LEARNING

When students are engaged in stealth learning, they don't know they're learning. The learning content is hidden in games, music, puzzles, and stories, and the learning happens "behind the scenes." Especially suited for very young learners, stealth learning attracts students and works to create effective learning opportunities when students are highly interested and more receptive.

Featured in this title

STEAM TOPICS & PROJECTS

In their academic careers and beyond, learners will likely need to be able to solve complex problems in a variety of technical fields. To prepare them for these demands, their language development can be embedded with content from Science, Technology, Engineering, Art and Design and Math. This also enriches the ELT classroom with a wider variety of content and concepts, as well as projects with tangible outputs that require use of 21st-century skills.

Featured in this title

SCAFFOLDING

Scaffolding refers to the instructional techniques for students to progressively move towards a stronger understanding of the learning process and, ultimately, greater independence. The term describes the effects of a physical scaffold applied in the educational process; a teacher provides temporary successive support to help students reach higher levels of comprehension and skill acquisition. Once no longer needed, this support system is slowly removed. This process results in the gradually shifting of responsibility over the learning process from teacher to student.

Compass Publishing Graded Readers

Compass Publishing Graded Readers

Graded readers from Compass Publishing include award-winning series designed to provide English-language learners enjoyable reading practice through original fiction, nonfiction and specially retold classic titles from around the world. English-language learners will enjoy developing their vocabulary acquisition, grammar application, reading fluency, and overall ability through the use of these materials.

What are graded readers?

Graded readers, also known as leveled readers or language-learning literature, are short fiction and nonfiction books with audio that are carefully developed to meet the specific needs of English-language learners. They are designed to keep learners interested and motivated through tight control of the plot, vocabulary, and grammar, and have been specially written or adapted within a controlled vocabulary level and grammatical syllabus, with difficulty increasing through the levels.

Why use graded readers?

Graded readers help students to learn how to read confidently, fluently, and quickly. Reading fluently is a skill that must be learned and practiced to quickly and confidently process text for its meaning, not just as a language exercise. Developing the skill to read fluently will not only help students to learn and use English, it will help them to do better on tests and in other real-life situations that require reading in English.

Graded readers are a teaching and learning tool that use a variety of ways to help students achieve specific English language results including:

- Fostering a more confident, motivated, and positive overall attitude toward studying English
- Automaticity (learning more vocabulary increasingly faster and with greater ease)
- Increasing comprehension and understanding of content through a variety of contexts
- Developing a more cohesive ability to intentionally control and manipulate grammar structures
- Cultivating a better command over speaking and writing skills
- Improving independent and social work, communication, cooperation, and work skills

Graded readers can be used in two ways:

Individual Reading Program

Creating and implementing an individual reading program allows students to become independent in their learning by borrowing books from the class library and reading them on their own. However, it also offers students the freedom to select titles that interest them, and to read at their own pace when and where they want.

Whole-Class Reading Program

Creating and implementing a whole-class reading program ensures all students have read the same graded reader. This method provides students with the opportunity to discuss the reader in a group setting which can promote team building.
